

Myson Introduces New Hard-Wired Pearl Towel Warmer

Date: October 9, 2008

Colchester, VT – Myson’s new, hard-wired, easy-to-install Pearl Towel Warmers are available in two multi-rail wall models, offering 8 bars and 10 bars. Manufactured from high quality stainless steel and available in the popular matte and bright stainless finishes, this new, affordable 24” wide Myson Towel Warmer is durable, corrosion resistant and won’t flake or chip.

The Pearl comes with ETL approval guaranteeing the highest standard of safety and reliability. The illuminated On/Off power switch lets you know when the Towel is ON. The heating element uses less energy than a light bulb and is so safe it can be left on 14-hours, seven days a week.

The Pearl is backed by Myson’s customer service and a two-year warranty. For more information, please call:
